

HOSPITAL BRIEF

Capital Hospital Islamabad was incorporated in the Capital Development Authority as a small day care Medical Centre providing preventive and curative medical facilities on outpatient basis to the employees of the Capital Development Authority, in particular and residents of Islamabad in general.

The need for in-patient care necessitated the conversion of this day care center into a hospital facility and in March 1981, a 60 bedded hospital was started comprising Medical and Paediatric wards, coronary care Unit, X-Ray Department, Pathology Laboratory, Dental Clinic, Dermatology Department and Mother & Child Health Centre.

In the Second Phase the Surgical Block of the hospital was completed and started function in September 1992 with the Department of General Surgery, Orthopaedics, Urology, Gynae and Obstetrics, Neonatology, Eye & ENT, Post-operative Intensive Care and Accident and Emergency Department. Thus the 60 bedded facility developed into a 250 bedded hospital equipped with the latest equipment and providing modern Medical & Surgical facilities to the patients in emergency, out-patient and the wards. In 1999 a new block to house outpatients and laboratory was also commissioned.

In 2008, Oxygen generation plant was installed at a cost of 15 Million. Capital Hospital is pioneer in this field. Moreover, a saving of 2-3 million/annum is being made since its installation

In 2010, Imaging Radiology Department was established having the facility of CT, MRI in year 2010. The Cath Lab is also established in the same year

In 2014 Cardiac Surgical Department was established with the project cost of about 97.00 million. Cardiac Surgical equipment have been purchased and installed.

In 2015. Proposal of construction of additional block to add 100 Beds more in the beds strength of hospital was approved in year 2014. Soon work will be started.
